

The Ultimate in Mold and Termite Prevention

Easy - Safe - Secure

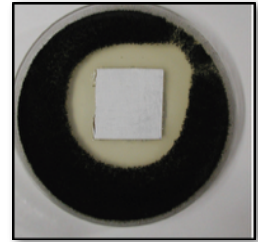

The Wise Choice

Across a wide variety of surfaces and in more diverse conditions, no other product performs as well as **ShieldAll®1020** in preventing mold. But as hard as it works, it's incredibly simple and cost effective to apply. From wood to concert and beyond. **ShieldAll®1020** has been tested and proven to offer long-term mold-resistance under the most demanding conditions.

Protect your construction materials. Safeguard your investment

Mold growth on construction materials has become a problem for builders during the construction phase and after the building is enclosed. **ShieldAll®1020** is water-based coating, containing fungistatic agents that provide long-term resistance to the growth of mold or mildew on its surface. The product is fast drying and provides resistance to water penetration. The product is breathable, allowing damp materials to dry quickly. The high coverage rate makes **ShieldAll®1020** ideal for economical protection of building materials in many stages of the construction process.

Flexible Use - Easy Application

ShieldAll®1020 is a paint-like product, providing a clean uniform surface that is completely safe for applicators and building occupants. It is also easy to apply with a roller, brush, or basic airless spray equipment and it cleans up with soap and water. While **ShieldAll®1020** goes on like paint, the protection it offers will have a long-lasting effect for years and years.

ShieldAll® 1020

mold resistance coating can be used in very specific areas with mold or humidity issues. It will protect building materials prone to mold growth.
